

Accedian Solution Enables Performance Assured Low Latency Services on Hibernia Express

Network solution delivers flexible data speeds on low latency services between New York and London

Montreal, Canada – March 3, 2016 - [Accedian](#), the end-to-end network performance experts, today announced that its network solution is being utilized by global telecommunication solutions provider, [Hibernia Networks](#), to provide tiered termination aggregation services. Hibernia Networks' new transatlantic cable, [Hibernia Express](#), offers the lowest latency transatlantic connectivity, capable of round-trip speeds of under 58.95 milliseconds between New York and London. The Accedian platform enables Hibernia Networks to provide flexible Ethernet speeds for its portfolio of industry-leading, low latency connectivity solutions, ensuring a more precisely scaled service that meets the individual requirements of its customers.

Service on the Hibernia Express cable system was launched in September 2015. The Accedian network solution was selected to help aggregate and terminate a tiered offering of low latency services, enabling Hibernia Networks to more effectively address the specific requirements of its customers. Underlying Accedian's unique technology is a field-programmable gate array (FPGA) chipset capable of processing every data packet at line speed.

The Accedian network solution is capable of providing monitoring and measurement functions on a one-way transatlantic transmission with sub-microsecond accuracy—enabling Hibernia Networks to provide more proactive performance assurance support for low latency services, from its network operations center. The performance monitoring metrics include latency, packet loss, and jitter.

"We're delighted to be part of Hibernia Networks state-of-the-art transatlantic cable system," said Patrick Ostiguy, CEO, Accedian. "Our ability to guarantee lowest possible latency through technology innovation and best-practice continues to provide the hallmark for our ongoing expansion as we serve an increasing number of service providers spanning wholesale, mobile, and cable networks."

"Delivering the lowest latency connection between North America and Europe is a major achievement in the development of submarine low latency cable facilities," said Al DiGabriele, Senior Vice President of Product Management and Marketing at Hibernia Networks. "Hibernia Express has become a business-changing differentiator for customers across many industries, including financial services firms and media companies, all looking to drive maximum network speed and performance at scale."

About Accedian

Accedian delivers exceptional end-to-end network performance visibility, for control over the best possible user experience. Providing the most complete, current view of network health, Accedian dramatically improves visibility with actionable insights for peak reliability and quality of service (QoS). Accedian enables control over increasingly complex networks to increase agility, and reduce cost. Most importantly, through a fully optimized and performance assured network, Accedian proactively ensures maximum uptime and for peak quality of experience (QoE). Since 2005, Accedian has assured hundreds of thousands of networks and services globally, turning performance into a key competitive differentiator. For more information, visit Accedian.com.

About Hibernia Networks

Hibernia Networks owns and operates a global network connecting North America, Europe and Asia, serving 89 markets and spanning 25 countries.

Hibernia Networks serves customers with unparalleled support, flexibility and service in a variety of industry segments including the financial services, web-centric, media and entertainment, and telecom service provider segments. Hibernia Networks provides secure and diverse dedicated Ethernet, DTM, Wavelengths and carrier-grade IP Transit services. As a true, end-to-end service provider, Hibernia Networks also offers cloud connectivity, low latency services and HiberniaCDN for seamless anytime, anywhere content delivery. Hibernia Networks' new transatlantic cable, [Hibernia Express](#), provides the lowest latency connectivity available between North America and Europe.
