

# SKYLIGHT™ PVX

## Unified network and application performance management

Delivering consistent and reliable application performance across networks is a difficult task.

SKYLIGHT™ PVX delivers unified performance monitoring visibility up and down the entire application chain and across the network, with best-in-class resolution and velocity.

This global view helps IT departments avoid and solve performance degradations by proactively monitoring end-user experience and network and application performance from a single platform.

Latest-generation analytics deliver proven business value, unifying teams with actionable insight that ensures digital resources are optimally deployed and used efficiently.

## 4 Clicks to Insight

- 1 Identify Problem Application or Site
- 2 Application Transactions TCP Session Details
- 3 Overview
- 4 App Monitoring Dashboard

SKYLIGHT PVX decodes every layer and transaction, as it happens. It provides exceptional scalability in the smallest footprint by using latest generation stream-processing analytics, transcending the cost / performance dependency of legacy systems.

### From Packets to Actionable Performance Insight

# Our Customers Say it Best

I would recommend SkyLIGHT™ PVX to any IT manager in charge of critical architecture. It improves our efficiency, helps deliver better service every day, and guides us to the right decision.

Henrik Adriaensen, IT Manager, INDEX.IS

We clearly have shorter resolution times with SkyLight PVX. We get clear facts and answers instantly. It also helps our network and security teams improve our infrastructure and prepare it for change.

Jeremy Renard, Network Engineer, BCPE Group

SkyLight PVX monitors every flow to our data center, and our 3,500 users. It provides visibility into every application. With SkyLight PVX, we have transitioned from reactive monitoring to proactive performance management.

Thomas Germain, CIO, Spie Batignolles
