

# Key takeaways of Network Management Megatrends 2020

Enterprise Management Associates' "Network Management Megatrends 2020" report is part of an ongoing biennial study that tracks the evolution of enterprise network engineering and operations. Based on a survey of 350 North American and European IT professionals, see what the 2020 research reveals below.

## Key driver of network management strategies: widespread network traffic growth in 2020

**96%** of enterprises are expecting an increase in network traffic in the next 12 months

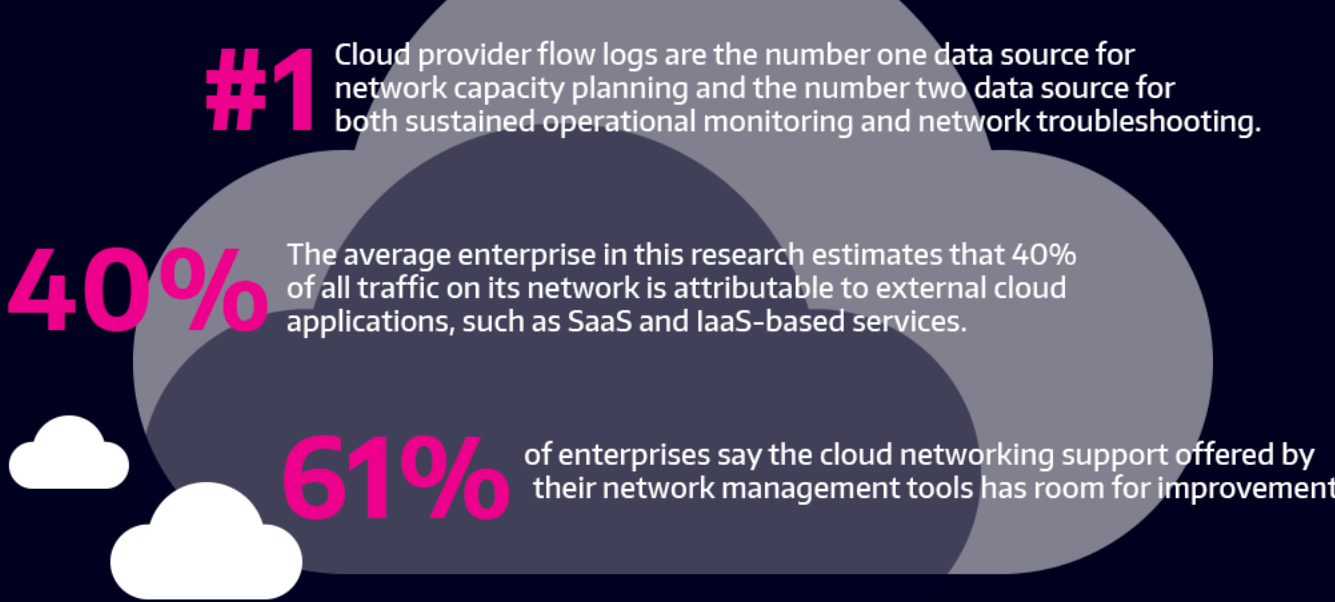

## Visibility is foundational to NetOps success

“There is a very strong correlation between network operations success and an integrated approach to network management tool procurement.”

Shamus McGilliuddy, VP Research

## Cloud performance insights essential

## Collaboration to combat cyber attackers

**64%** of enterprises have formalized collaboration between the network team and the security team.

This collaboration focuses primarily on

- Network troubleshooting/ security incident response
- Operational monitoring
- Infrastructure design/ implementation
- Technology evaluation/ procurement

EMA found a very strong correlation between close NetSecOps collaboration and overall network operations success.

**97%** of network teams are interested in using security capabilities provided by their network management vendors.

**30%** say this is critical to their efforts to collaborate with the security group.
